# Health Insurance Premium Relief

Thanks to Governor Mark Dayton and the Legislature, anyone who has purchased a health care policy through the individual market will see a 25 percent automatic discount on their monthly bill.

If you have not purchased health insurance for 2017, take the first step and purchase health insurance before open enrollment ends:

- Deadline is Feb. 8 when you purchase through MNSure, Blue Plus, or Health Partners
- Deadline is Jan. 31 when you purchase direct through other insurance companies

## How do I get the 25% automatic discount?

The 25 percent automatic discount is available to Minnesotans who purchase insurance through the individual market and do not currently receive federal tax credits for health insurance, known as advanced premium tax credits. Insurance can be purchased directly through an insurance provider, or through MNSure.

If you are eligible, you will see an automatic discount on your health insurance bill by April, and each month for the rest of the year. You pay the discounted price up front and the State of Minnesota reimburses the health insurance carrier.

It's that simple. No application. No red tape. No waiting to see if you're approved. If you are eligible you will get the discount.

Don't wait! The open enrollment deadline to purchase health insurance through MNSure, Blue Plus, or Health Partners is **February 8!**
